Summary

Passionate web developer dedicated to creating responsive, user-centered digital experiences. Experienced in designing and building dynamic web applications from concept to deployment, with a strong focus on usability, performance, and modern design principles. Committed to delivering clean, efficient, and scalable solutions that balance functionality, reliability, and exceptional user experiences.

Projects

Aurelia · Web Developer

<https://github.com/Dashersd/Aurelia> · <https://aurelia-sigma.vercel.app/>

A modern, elegant luxury jewelry e-commerce website designed for premium collections. Features high-performance interactive showcases and sophisticated animations.

Tech: React, Tailwind, Framer Motion

Time Shift · Web Developer

<https://github.com/Dashersd/TimeShift> · <https://time-shift-ivory.vercel.app/watch.html>

A premium e-commerce platform for luxury timepieces. Implements an intricate 3D animated analog clock, dynamic scroll-driven visual transitions, a sleek collection catalog, and a fully functional shopping cart.

Tech: HTML5, CSS3, JavaScript

Polaris · Web Developer

<https://github.com/Dashersd/Polaris> · <https://polaris-chi-olive.vercel.app/>

Much like the North Star, Polaris is your ultimate style compass. Discover curated, avant-garde fashion designed to help you stand out and find your own direction.

Tech: React, Tailwind CSS, Framer Motion, Vite

Eutopia · Web Developer

<https://github.com/Dashersd/eutopia> · <https://eutopia-indol.vercel.app/>

A creative workspace where imagination sparks. Eutopia shapes avant-garde ideas that don't exist yet and brings them to life through the power of AI.

Tech: React, Tailwind CSS, Framer Motion, Vite

MDRRMO Information Management System · Web Developer

<https://github.com/Dashersd/MDRRMO> · <https://mdrrmo-system.infinityfreeapp.com/>

Developed a web-based Disaster Risk Reduction and Management Information System (DRRMIS) for the Municipal Disaster Risk Reduction and Management Office (MDRRMO) to streamline incident reporting, user management, equipment tracking, and disaster-related activities. The system features role-based access control for administrators and BDRRMO staff, enabling efficient incident submission, review, approval workflows, and centralized disaster management operations.

Tech: PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap, AJAX, jQuery, InfinityFree Hosting

Star Fleet · Developer

<https://github.com/Dashersd/Star-Fleet> · <https://star-fleet-silk.vercel.app/>

An interactive, futuristic web application featuring a stunning sci-fi inspired interface. It leverages modern web technologies to deliver an immersive user experience.

Tech: React, Tailwind, Vite
